

Learn How ClickPay Can Add Associations to Biller Network to Avoid Problematic Bank Checks.

An ever-increasing amount of homeowner payments originate from bank websites & take the longest time to deposit. Homeowners believe that funds are transferred electronically, but Association Managers know that these funds are instead being mailed to them in the form of a bank check 7-10 days later.

ACCELERATE BANK CHECKS BY UP TO A WEEK

Once the check finally arrives, identifying the payee & applying the payment becomes a lengthy, manual process due to the lack of a coupon or homeowner identifier. Homeowners are then often saddled with unnecessary late fees while Associations are left waiting on checks via snail mail for payments that were actually initiated online!

Homeowners are then often saddled with unnecessary late fees while Associations are left waiting on checks via snail mail for payments that were actually initiated online!

Why ClickPay?

ClickPay's proprietary solution eliminates problem bank checks by electronically sweeping data, resulting in accelerated cash flow and realized operational efficiencies.

The Solution

Bank Bill Pay is ClickPay's proprietary solution that electronically sweeps transactions initiated from a bank website, eliminating the creation of bank checks and increasing electronic payment adoption up to 25%.

How It Works

As a recognized national biller across 5,000 banks, ClickPay can electronically sweep funds for payments initiated through a homeowner's bank website. Clients with access to ClickPay's biller network receive expedited bank deposits by an average of 5 business days while the homeowner experience goes unchanged.
